PROFESSIONAL SUMMARY

Full Stack Software Engineer with 6+ years of verified experience building high-throughput microservices, responsive web apps, and automated cloud infrastructure using Python, React, and AWS.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML5, CSS3

Frameworks: FastAPI, Django, React, Next.js, Redux, Tailwind CSS

Databases & Cloud: PostgreSQL, Redis, AWS, Docker, GitHub Actions, CI/CD

Practices: Microservices, REST APIs, Unit Testing, PyTest, Agile

PROFESSIONAL EXPERIENCE

Senior Software Engineer | CloudScale Technologies *Jan 2021 - Present*

- Architected and deployed 12+ RESTful microservices in Python using FastAPI and PostgreSQL, serving 500k+ daily requests.
- Designed and led migration of core customer portal to React and Next.js, cutting page load times by 42%.
- Integrated Redis caching layer, decreasing database query latency by 65% during peak traffic bursts.
- Mentored 4 junior software engineers on clean architecture, PyTest unit testing, and Git workflows.

Full Stack Developer | Apex Digital Labs *Jun 2018 - Dec 2020*

- Developed full-stack web applications using Python, Django, and React.
- Created automated CI/CD pipelines with GitHub Actions and Docker, reducing release cycle time from 2 weeks to 2 days.
- Optimized complex PostgreSQL queries and indexing, saving over $15,000 annually in AWS RDS compute costs.

PROJECTS

Enterprise Document Search Engine | *Python, FastAPI, React, PostgreSQL, Docker*

- Built full-text indexing engine searching across 2M+ PDF legal documents in under 120ms.
- Created responsive UI with React and Tailwind CSS featuring faceted filters and instant search.

EDUCATION

Bachelor of Technology in Computer Science and Engineering *2018*
University of Washington — GPA: 3.8/4.0

CERTIFICATIONS

- AWS Certified Developer - Associate
- HashiCorp Certified: Terraform Associate
